MedicX

Location:

Cardiff

Land use:

Healthcare

### Project description

Asbri Transport has been appointed by MedicX to assist with a planning application to construct a new medical centre on brownfield land abutting the Whitchurch Road district centre, Cardiff.

Asbri Transport produced a Transport Statement to support the detailed planning application. We conducted peak hour traffic surveys, and undertook a detailed appraisal of the transport network surrounding the development site. This included pedestrian and cycle infrastructure; public transport services and facilities; and the local highway network. In discussions with the highway authority we have considered a range of measures to enhance pedestrian and cycle facilities.

The Transport Statement also predicted the likely volume of trips by mode generated by the proposed development and their impact on the local transport network.
